5. THE RIGHT TO EXPECT THAT WE BE IN STOCK OF OUR BEST SELLING ITEMS.
6. THE RIGHT TO EXPECT OUR WEBSITE TO BE USER FRIENDLY AND MAINTAINED WITH CURRENT INFORMATION.

# NEW SHIPPING POLICY

## YOU WILL REALLY LIKE THIS!

AS USUAL : **Jim Carter Truck Parts** is a STEP ABOVE  
in providing timely shipping!

Every effort is made to ship orders within 24 hour business days. Orders to you will no longer be held if there is a BACK ORDER. Upon receipt, BACK ORDERS will be sent to you.

Due to the nature of our business,  
most items are manufactured by the outside  
companies we know. Unfortunately, sometimes it is difficult to predict  
their delivery date. We will no longer hold your order waiting for your  
BACK ORDER to arrive at our shop.

## A BIG POSITIVE FOR YOU

We hope this is very acceptable to you, **Our Customer!**  
It also allows you to continue with most of your restoration  
WITHOUT WAITING for the total order to be sent at one time.

## Freight and Handling Policy

We are well aware of your concern about freight and handling charges.  
You can be assured that we don't make a profit on freight and packing materials.  
We follow the national charges we pay, which vary depending on fuel prices and the costs to us.

Our history will verify that shipping and handling fees are fair and as low as possible. If...you don't send enough money on freight, we email you a note requesting an additional payment. Please pay this quickly, as we reserve the right to hold future shipments if this is not paid. Overpayments on freight will usually be credited in our computer for your next order, -unless you request otherwise.

Our computerized scales tell us the least expensive way to ship is with UPS, DHL, or U.S. Mail.  
Our high-volume, lower-freight discounts save you \$\$ with each order!  
Because we are in the *Heart Of America*, we don't charge across the country high freight.

## How Shipped...

Majority of items are sent United Parcel Service or U.S. Mail, with each parcel insured up to \$100 an no extra cost.

US Postal Service is used for most lighter weight boxes...  
Truck Line for heavier or oversized items.

## Overseas...

Overseas orders are usually sent by less expensive US Mail, UPS or a specialized air freight company that will be competitively priced.  
If you receive a damaged package by mail, please contact us as soon as possible.

## Service By Air Freight...

Need parts fast? We ship by air!  
For an extra fee, we offer next day, second day, and third day delivery.  
If you ask, even a UPS Saturday delivery can be arranged.  
Just tell us this requirement when you order!

## Truck Line Orders...

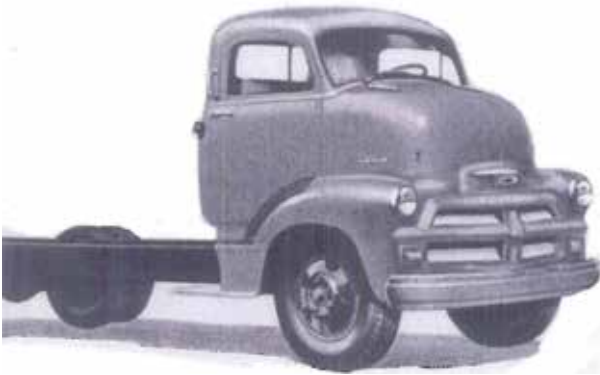

All large items that must be shipped truck line *must be prepaid*.  
In addition, a crating or boxing charge mat be added to your order if items are very heavy and require special handling.  
Remember, shipping to a commercial address rather than your home always lowers your freight charges!  
Inspect all incoming packages for damage.  
If damages are observed make sure the driver notes and signs the receipt as being damaged.

This  icon is shown beside all large items found in this catalog.

An introduction page may seem a little unusual for a parts catalog, however, it is an excellent way to tell you something about myself and our business. You should know some details about a company or a person you plan on dealing with. Since we sell parts worldwide, this is probably the best way to tell you who I am and why I have a Chevrolet and GMC truck parts business.

My first antique car, a Model A Ford, was purchased during my college years in the mid-1960's. Over several years, I personally gave it a ground-up restoration and became very active in local and national clubs. Though a Model A remains in my possession, interest gradually drifted toward early pickups.

In 1978, I purchased my present 1950 Chevrolet 1/2 ton pickup to use as a daily driver. Though it worked well, the decision was finally made to give it a near total restoration. This began the truck parts business. While some parts waited for their turn in the restoration, persons would request them for immediate use. I would then reorder for my own use. This began to snowball and soon, with some experimental ads in national magazines for bedwood and strips, plus my enjoyment of trucks, the business took off, with also many other parts I thought were the most needed.

After 15 years with a major national corporation, it was felt that this field was more rewarding. A decision was made that a mid-life career change should be made. All past sales and business expertise would be put into making this a successful enterprise. This has been done with many personal rewards. The goal is to continue to look ahead, develop and introduce new parts for the older GM pickup. When we do what we enjoy you never work. There are no limitations on achievements!

We are now seeing the early stepside pickup growing in popularity like the Model A Ford in the 1960's. I share the opinion,

with many, that desirability of the Chevrolet and GMC stepside pickups continues to grow. It will far surpass the popularity of the Model A Ford. Even now, the choice lower production items for these trucks are becoming very difficult to find as more people visit the few remaining salvage yards having older vehicles. You own your old GM truck at the right time. It is an investment even if you only set it in your garage.

Yes, this business sells parts, but it is based on service to the customer. My personal involvement in the restoration of pickups, plus more than 60 years enjoying antique vehicles, results in this dealer loving the business I am in. Over 18 employees, many phone lines, two daily UPS & Post Office visits, 6 storage buildings in our town, etc. makes service to our customers among the best!! Do not hesitate to call if we can be of assistance.

Thanks,

*Jim Carter*

One of the more common questions asked is, "How do I tell the different years of these trucks?" Your truck may have come without a title, many do. Some have parts interchanged with several years, even though they are correct for only one year. Body and bed changes during the last 30 to 60 years, just to keep the truck going, now make some restorations confusing.

In the following, several items per year will be mentioned which might help you, in the field, when looking to buy a truck or just parts. The comment by each year does not mean it is always exclusive for that year only. If you feel some errors exist, please let us know.

### 1946 vs. 1947

Note: Occasionally a customer's truck is titled 1947 but the body design is 1946. It can make ordering parts confusing.

Reasoning:

1. Factories produced the 1946 design through about April 1947.
2. The Chevrolet "Master Parts Catalog" does not show an early 1947. When this year is mentioned by GM it always refers to the 1947-55 series "Advanced Body Style".

### Mid 1947

The first new body series since before World War II. Gas tank under bed. Last year for floor shift three-speed transmission without external linkage. Nine planks in bed. Truck name stamped in tailgate. Bed approximately 2" wider than prior style. Vacuum wiper moved under dash from above windshield. Non-synchronized 4 speed transmission.

### 1948

Hood emblem is still die cast metal. Windlace around door is black rubber and secured with metal strips screwed in place. Gas tank still under bed. Headliner center bow screwed in place. Redesigned three-speed transmission now uses column shift with linkage attached to side of case. The new 4 speed transmission is now synchronized.

### Early 1949

Gas tank moved into cab behind seat. Hood emblem becomes chrome plated steel. As in '47 and '48, on Chevrolet light trucks hood side chrome emblem states Thriftmaster. Large truck with 20" wheels have side hood emblem stating Loadmaster.

### Mid 1949

Last lever action shocks on Chevrolet and GMCs. Cab windlace goes to gray tan and slides into metal track around door. Headliner center bow is now "floating" type. Hood side emblems on Chevrolet begin as described in 1950 listing.

### 1950

Handle for left side cowl vent door is flat steel, not maroon plastic knob design, as earlier. Modern tubular shocks introduced. Headlight rings remain chrome plated brass. Wiper knob is chrome plated. Hood side emblem on Chevrolet show this name plus 3100 on 1/2 ton, 3600 on 3/4 ton, 3800 on 1 ton, etc.

## 1951

Only year with both pull down exterior door handles plus wing vents in doors. Engine in pickups remains 216 cubic inch babbit bearing low oil pressure type for Chevrolet, (used from 1937 to 1953). GMC continues with the 228 cubic inch full pressure engine as their standard unit. Seat adjustment horizontal rod under cushion is run through a rubber grommet which is secured to the seat riser frame. Earlier year seats adjusted with a metal wire cable. In mid-year, bed changed from nine board to eight board type. Speedometer maximum speed 80 mph.

## 1952

Due to Korean War shortages, much bright trim was discontinued due to price increases. Horizontal strips below and above radio speaker grille plus glovebox door changes from stainless steel to painted steel. Chevrolet hub caps changed from chrome plated to gray painted steel with black block letters, however, stamping and shape remain the same as prior years. Some say a very few deluxe early 1/2 ton pickups still carried the chrome cap. Speedometer now shows maximum speed 90 mph. Outer door handles became push button type.

## 1953

Hood front emblem now stainless steel. First year for the optional left side mount spare on pickups. Last year for wood blocks under bed on top of frame rail. Wiper knob is maroon plastic, as in 1952. First year for blue and silver ID door post plate. Earlier years are black and silver.

## 1954

Chevrolet has the newly introduced cross type grille plus the new high pressure 235 cubic inch insert bearing engine on pickups and 261 cubic inch six cylinder on large trucks. Hub caps have the same shape as the 1947-53 type, however, now have only the Bowtie emblem. Redesigned dash board totally different. Bed changed - has increased in depth with all new bed sides. Rear bumper is an option since 1951, but is now lowered in center to make room for new license plate location. Taillight becomes round. Windshield is curved one piece.

## Early 1955

Almost identical to the 1954. First year for the open drive shaft on 1/2 ton pickup, Suburban and panel truck. Final series with the 6-volt system on Chevrolet. GMC continues to use 6 volts throughout the year into the next body style on 6 cylinders only.

A great increase in truck rebuilding is now occurring throughout the country. Though most enthusiasts build a fun truck with numerous modifications and drive them daily, some require their vehicle to be as detailed as they were when new.

For those involved in restoring their truck to this exact originality, the following data should be of interest. These appear to be the more asked about subjects by our customers.

- From at least 1955 and before, the raised letters on the Chevrolet tailgates were not a contrasting color. They remained the same color as the overall gate. It appears GMC did add this color to their three letters on many of their Advance Design tailgates.
- The planks were not varnished in the bed or given a related finish to show off the wood grain. Trucks were produced for work and the planks were normally painted black on the 1955 and earlier. After this, they were body color or black. This better protects the wood.
- The bed planks have not been oak since the late 1930's. From then to the newer GM step pickups, the wood is hard yellow pine.
- From 1939 and up, the GMC six cylinder was a high pressure insert bearing engine - initially 228 and 248 cubic inches. Chevrolet trucks did not adopt the full insert bearing engine until 1954. This results in their similar appearing dash clusters having an exception of maximum oil pressure gauge reading of 60# or 80# for GMC and 30# for Chevrolet.
- Almost all Canadian built GMC pickups prior to 1953 used the Chevrolet 216 engine, not the 228 and 248 GMC type placed in U.S. trucks. The 1 1/2 and 2 ton Canadian Chevrolet using the larger GMC 228 and 248 was the "Maple Leaf"!
- Between 1947-53 on light trucks, the cabs and fenders were the same color. On this series, two-tone cabs were not available until 1954. Only then was a white top available as an option and only on the more deluxe cabs.
- Most 1/2 ton pickups prior to 1955 used 16" wheels. Rarely the optional 15" and never 14".
- Radios were first available as an "in dash" accessory on the 1947 "Advance Design" body style.
- Right side taillights were an accessory until the late 1950's.
- Full wheel covers were not available on Chevrolet until 1954 and then only as a dealer accessory.
- Dark green was the standard exterior paint color prior to 1955. Most other colors, including black, were a non-cost option.

- On the 1947-55 series, the door panels match the seat material. They are not similar to the headliner cardboard.
- Shortages during the Korean War are the primary reasons for the eliminating of bright work on the mid-1951 to 1953 truck. Therefore, painted items on these trucks included: hub caps, bumpers, grille, radio speaker horizontal trim, glovebox door, etc. Interior window cranks and wiper knobs changed to maroon plastic.
- During 1947-48, the Chevrolet painted grille bars and “back splash” bars body color. In addition, the leading edge of each painted outer bar had a horizontal stripe matching the cab stripe. On the 1949-51 Chevrolet, with a painted or chrome grille, the “back splash” bar was Waldorf white. In 1952-53 this changed to light gray to match hub caps and bumpers. On chrome grilles, only the outer bar was plated. The “back splash” inner bar was as the painted grille.
- The cabs on both the pickups and the larger trucks are the same. The front fenders and grill must be different due to the increase in tire size on the larger trucks. On 1947-55 trucks, even the hoods are larger to adapt to these bigger fenders.
- The GMC with six-volt system uses a positive ground electrical system. Chevrolet is negative ground.
- The GMC and Chevrolet pickups share bodies, most suspension, transmissions, etc. - not engines, grilles, hoods, tailgates, exterior colors, or hub caps.
- Early trucks were titled on either the body ID plate or engine number. If your title used the engine number and it has been replaced over the years, you may have major problems in selling or licensing.
- The famous Chevrolet high pressure 235 engine was used between 1954 and 1962. It's big brother, with some larger internal parts, was the 261 engine. A low pressure Chevrolet 235 was available on larger trucks only between 1941 and 1953. This earlier 235 has little interchange in common with it's later 235 relative.

## STEPSIDE BED WOOD SETS

Planks cut and grooved. Excellent quality “C” grade hard yellow pine (P) or clear oak (O) is used in these replacement wood sets. Wood is smooth finish with a very attractive grain.

**Note: For the perfectionist. Oak was discontinued as bed wood in GM trucks about 1940. From that time until bed wood floors were stopped in 1987, the GM wood of choice was yellow pine. This is a hard wood with pronounced grain. It should not be compared to softer white pine. Originally bed wood was painted black, body color or given a protection sealer. It was never varnished or given a related furniture finish when new. We offer oak as a very attractive alternative for the custom, non-original truck.**

**ATTENTION:** Our pine wood is just as good as the original over 60 years ago. Therefore, this means that there can be a few very small imperfections - Just like GM did it 60 years ago.

**IT PAYS!**

**Chevrolet Trucks  
Work-horses of America!**

For Power . . . Stamina . . . Economy—  
Choose America's Top Truck Favorite!

Here's the "worker" you've wanted . . . the Advance-Design Chevrolet truck! It's the most powerful Chevrolet truck ever built . . . handles every job easier, faster, with utmost economy.

## ADVANCE-DESIGN TRUCKS

If you want a life-size picture of the ideal farm truck, watch these new Chevrolet trucks in action! To put it plainly, they're unbeatable. Chevrolet has never built a truck with so much power . . . with so much real get-up-and-go. They're sturdy, dependable, easy to handle . . . and they're *economical*. You save money every mile and every load with Chevrolet's low cost of operation and upkeep. And you save on purchase price too—get more for your dollars. Your good judgment will tell you that Chevrolet is the truck that belongs on your farm. See your Chevrolet dealer.

CHEVROLET MOTOR DIVISION, General Motors Corporation, DETROIT 2, MICHIGAN

### PAYLOAD LEADERS

For low cost per ton mile, Chevrolet trucks are the choice of thrifty farm owners everywhere. The rugged construction and all-around economy of Chevrolet trucks cut running and upkeep costs—let you haul your loads with real reductions in operating expense.

### PERFORMANCE LEADERS

On the hills or on the straightaway, the super efficient new Chevrolet trucks are miles ahead in performance. They give you high pulling power over a wide range of usable road speeds—and high acceleration to cut down total trip time.

### POPULARITY LEADERS

Chevrolet trucks have led in demand and sales for the last eight consecutive truck production years . . . are far ahead again this year according to current registration figures. Here's convincing proof of greater owner satisfaction.

### PRICE LEADERS

From low purchase price to high resale value, you're money ahead with Chevrolet trucks. Chevrolet's rock-bottom initial cost—outstandingly low cost of operation and upkeep—and high trade-in value, all add up to the lowest price for you.

**Plus all these Advance-Design features:** TWO GREAT VALVE-IN-HEAD ENGINES: the new 105-h.p. Loadmaster and the improved 92-h.p. Thriftmaster—to give you greater power per gallon, lower cost per load • THE NEW POWER-JET CARBURETOR: smoother, quicker acceleration response • DIAPHRAGM SPRING CLUTCH for easy action engagement • SYNCHRO-MESH TRANSMISSIONS for fast, smooth shifting • HYPOID REAR AXLES—5 times more durable than spiral bevel type • DOUBLE-ARTICULATED BRAKES—for complete driver control • WIDE-BASE WHEELS for increased tire mileage • ADVANCE-DESIGN STYLING with the "Cab that Breathes" • BALL-TYPE STEERING for easier handling • UNIT-DESIGN BODIES—precision built.

## CAB INSULATION KITS

### Cab Insulation Kits

Most people love our older GM trucks but some wish for the more quiet-riding comfort found in modern vehicles. We have the solution with new "state of the art" truck acoustic technology. Our kits use a multistage, automotive insulation, and dampening system that nicely controls cab noise, metal vibration, and heat.

In about two hours you can install these pre-sized, self-adhesive sound-damper for pads plus the pre-trimmed heat absorber/ barrier panels that are custom cut to the size of your trucks interior. Once the headliner, door panels, floor mat, seat cushions and rear metal interior panels are put back in place, no one will see the barrier material, but you will know immediately on the first drive! Instructions include location and labels on each panel. Spray adhesive and sealing tape help complete the improvements.

**Note: Vertical portion of Firewall insulation included in FP153, FP156 cover.**

Part No.	Description	Type	Price
CBK151	1947-55 Cab Insulation	kit	\$467.25

### Cab Insulation Sheets by HushMat, Black

Now an inexpensive way to quiet your ride on all early trucks and cars! Eliminates much road noise and vibration plus provides thermal insulation. Apply to door and roof skin, cab panels, and floors from firewall to rear panel. Virtually no pre-cleaning. One-Step application simply cut, peel, and stick. Approx: .07 inches thick. Bends and forms easily. Cut sheets to the size needed. The black color helps hide it in dark places. Made in USA.

"When I say real heavy-duty value, brother, I mean Chevrolet Advance-Design trucks!"

Sure, there are Advance-Design trucks for special heavy-duty jobs. Look at this one. They tell me there are 107 different models . . . on eight different wheelbases—trucks for all the trades!

See those rear-corner windows?\* They make it easy and safe to back up. These trucks are really new—from roof to road, with Advance-Design! Another thing, they have the world's most economical engine for its size—Chevrolet's valve-in-head truck engine!

Comfort? Give me the cab that "breathes"!\* It's Flexi-Mounted—cushioned on rubber. Has 12 inches more foot room—eight inches more seating space. Understand there's 22% more visibility, too, and the seat is fully adjustable!

Look here at these stronger new FRAMES! Notice that the wheelbases are longer, for better load distribution. Brakes? The best! They're exclusively designed for greater brake-lining contact.

\*Fresh-air heating and ventilating system and rear-corner windows optional at extra cost.

EL218	1947-53	each	\$34.40
EL196	1954-59	each	\$34.40

### Horn Mounting Bracket

Attaches factory horn to original intake manifold. Not used with the add-on oil filter, however we often have an original in our used dept.

Part No.	Description	Type	Price
EL336	1937-52	each	\$20.50

### Horn Relays

Part No.	Description	Type	Price
EL148	1953-55 6 volt	each	\$30.45

EL520

### Steering Wheel Brush and Contact

Fits in wheel hub. A must for a 6 volt system.

Part No.	Description	Type	Price
EL520	1947-52 for 6 volt trucks without horn relay (as original)	each	\$10.00
EL525	1947-72 for 12 volt trucks	each	\$7.30

**Note: EL520 will operate on 6 or 12 volts and has a copper cable inside.**

### Steering Mast Bearing

Part No.	Description	Type	Price
EL109	1947-59 with horn wire	each	\$62.50

### COILS

EL142

### Ignition Coils

Part No.	Description	Type	Price
EL143	1947-55 6 volt	each	\$29.95
EL142	1934-72 12 volt	each	\$24.75.

**Resistor Ignition Coil**

Styled like original unit. Eliminates outside reducer (EL181 below) in the wire to distributor, when 12 volts are used. (Allows ignition points to operate on correct lower voltage.)

Part No.	Description	Type	Price
EL158	Resistor ignition coil	each	\$50.15

**VOLTAGE REDUCERS**

Drops 12 volt current to 6 volt. Place in line to 6 volt accessories if you convert to 12 volt.

Part No.	Description	Type	Price
EL181	Medium duty, keeps the necessary 6 volt current to ignition points	each	\$16.75
EL135	Heavy duty, for accessories such as radio or heater	each	\$25.15
EL110	Light duty, for gas gauge	each	\$4.50
EL311	Light duty, for gas gauge (exact readings)	each	\$28.75

**Note: This one amp "Runtz" voltage reducer (EL311) gives exact readings by otherwise good gauges. Negative ground only.**

**VOLTAGE REGULATOR**

EL140

**For Generators**

Attaches to firewall, as original.

Part No.	Description	Type	Price
EL140	1940-55 Chevrolet 6 volt, negative ground	each	\$131.80
EL159	1955-62 12 volt for generators	each	\$83.75

**VOLTAGE BOOSTER**

Will operate 12 volt negative ground accessories from 6 or 8 volt negative ground electrical systems. The booster is very small (3-1/2" x 2-1/8" x 1-5/8") and is easily mounted behind dash. It can continuously supply about 1-3/4 amps, which is adequate for stereos, CB radios, cellular phone chargers, radar detectors, etc. One year warranty. Note: Will not work with positive ground systems.

Part No.	Description	Type	Price
EL219	Voltage Booster for 6 volt systems. Chevrolet	each	\$121.25

**BATTERY CABLES**

EL113

**Ground Straps, Open Braided As Original.**

Six volt vehicles need these two ground straps to allow the starter to operate efficiently. These correct cables will solve many hard starting problems so you do not need to change over to a 12 volt system!

Part No.	Description	Type	Price
EL146	1934-early 55 Belt housing to frame (12")	each	\$11.05
EL113	1934-early 55 Battery to frame (14")	each	\$23.10

EL428

**Battery Cable, 39 3/4"**

These are the heavier gauge battery to starter style. Necessary for 6 volt systems.

Part No.	Description	Type	Price
EL164	1947-55 Original style, cloth covered	each	\$74.15
EL428	1947-55 Vinyl, covered replacement	each	\$25.75

**Battery Positive Cable Clip**

Secures (EL164 and EL428) Chevrolet cable to frame rail. Made in USA. Bend to fit perfectly.

Part No.	Description	Type	Price
EL407	1941-54	each	\$4.15

**Battery Ground Cable Clip**

Holds original cable away from starter rod coil spring. Made in USA.

Part No.	Description	Type	Price
EL425	1941-53	each	\$8.95

**MISCELLANEOUS ELECTRICAL ITEMS**

EL115

**Heater Blower Motors**

Fits well on recirculator round core housings. (Redrill heater housing for use on a 1947-55 fresh air unit.) These motors have a smaller outside diameter than original 6-volt fresh air heater units.

Part No.	Description	Type	Price
EL115	1947-55 6 volt- 1/4" shaft	each	\$67.75
EL116	1947-66 12 volt- 1/4" shaft	each	\$62.95

LG160

**Wiring Loom**

Black fabric loom to protect wiring, exact as original.

Part No.	Description	Type	Price
LG112	Headlight loom (light bucket to inner fender terminal block) 3/8"	foot	\$1.95
LG160	Taillight loom (taillight to under bed) 5/16"	foot	\$1.70

**Terminal Blocks**

Fits on inner fender. These insulators connect headlight wire pigtail to main harness.

Part No.	Description	Type	Price
EL137	1937-53 Two 3 position blocks	pair	\$23.90
EL173	1954-55 One 3 position block and one 4 position block	pair	\$24.95

**Ignition Switch Cylinder and Key**

Part No.	Description	Type	Price
EL103	1949-66	each	\$24.50

**Ignition Switch Bracket**

Fits on lower edge of dash and holds original ignition switch zinc plated. Made in USA.

Part No.	Description	Type	Price
EL465	1947-53	each	\$27.05

## 47-55 First Series

**Ignition Bezel**

Holds ignition switch in dash. Round with inside threads. Die cast and chrome plated.

Part No.	Description	Type	Price
KB152	1954-55	each	\$15.50

**Spark Plug Wires**

These are NOT just "get by" universal wire sets. They are custom made with proper ends and lengths for each type engine. Select these wire sets when you expect the best on the market. (The inside has a carbon core to protect the radio.) Chevrolet and GMC.

Part No.	Description	Type	Price
EL130	1934-53 Black wire with exposed metal ends and two rubber rings	set	\$28.30
ELW540	1954-62 Black wires with covered metal ends	set	\$23.05
ELW542	1937-62 HEI replacement wires*	set	\$49.10

**Note: See High Performance Section for HEI Distributor.**

**NOTE: The set EL130 and ELW540 can be interchanged between 216, 235, and GMC six cylinder engines.**

**Spark Plug Wire Rubber Rings**

For holding spark plug wires as original, included in EL130.

Part No.	Description	Type	Price
EL147	1937-62 Chevrolet six cylinder	pair	\$2.05

**Grommet, Main Wiring Loom**

Protects main loom as it passes through sheet metal firewall.

Part No.	Description	Type	Price
FP129	1936-59	each	\$3.95

**Taillight Wiring Grommet**

Fits in the frame hole near taillight to protect wiring.

Part No.	Description	Type	Price
LG1061	1940-72	pair	\$3.70

**WIRING HARNESSES**

**All USA.**

A complete quality wiring harness using the modern PVC coated copper wire. The best PVC on the market. These hand built harnesses are made individually in America. Not a quick made "get by" harness. Detailed installation instructions. Includes built-in directional light wire if you decide to add this option. If you are looking for an original style cotton covered harness check our next section.

### TURN SIGNAL KITS

These kits are designed to fit behind the dash out of sight and do not clamp on steering column. Only a toggle switch lever is seen below dash. A beep-beep from behind dash indicates that the signal is flashing. This keeps a more original dash appearance, and still allows for this convenient accessory. Includes wiring, double filament sockets, switches, flasher, and instructions. This system fits inside original taillight, but is independent from the stoplight bulbs! It can be made to operate original park lights or custom lights. American made. Top quality!

Part No.	Description	Type	Price
EL1316	1934-early 55 6 volt	set	\$134.50
EL13112	1934-59 12 volt	set	\$134.50

## Chevrolet Trucks

**Cost Less....Carry heavier loads!**

CHEVROLET MOTOR DIVISION,  
General Motors Corporation, DETROIT 2, MICHIGAN

TRUCKS ARE ESSENTIAL  
TO A NATRON ON THE MOVE.

## Whether the job's BIG, "little" or in between Chevrolet has the truck for the job

Capacity for capacity, specification for specification, the Chevrolet truck that is right for your job *lasts for days*. It works for real *rather "traps"*. It gets work done *in short order*, with no waste of time or money.

Whether you need a truck that is tough enough to hold a load, or a truck that is tough enough to hold a load, or a truck that is tough enough to hold a load, Chevrolet has a truck that's exactly right for your job.

See your nearest truck dealer to make your choice. Or write to Chevrolet, Dept. 100, 1000 Chevrolet Building, Detroit, Michigan. Chevrolet provides the specific information you need. Chevrolet is the one with more trucks, more parts, and more service.

That's why, for a long, long time, truck men have made Chevrolet trucks *last and save*. They don't choose. They get busy *doing as much Chevrolet work as the next man can combine!*

Trucks, buses and heavy machinery for the job. Chevrolet trucks are the Standard Class. Chevrolet is a Name on the Move. See your Chevrolet dealer. Chevrolet Division of General Motors, Detroit 2, Michigan.

## FLOOR MATS

**FL102**

**FL159**

### Floor Mat Material

Cut your own shape to make an excellent mat. Good if your year is not reproduced. Simply make a paper pattern and cut the shape on this pebble grain mat material. Enough material for one front floor. (approx: 36" x 63")

Part No.	Description	Type	Price
FL147	1934-59 Per truck	each	\$72.45

### Quality Floor Mats

On FL102: We just made our own tooling to be like the original. Even has the small ridges on bottom to help dry water leaks. Remove perforated plug under mat if used over a 4-speed transmission. Pedal holes marked on back. Custom trucks use "as is".

Part No.	Description	Type	Price
FL102	1947-55 3 and 4-speed, except Cab Over Engine (COE) molded rubber	each	\$129.95
FL159	1947-55 4-speed, Cab Over Engine (COE), 2-piece hand cut	set	\$121.30

**Note: Carpeting listed in UPHOLSTERY section.**

### Floor Mat Felt Pad

Helps reduce engine heat and road noise in cab. Not original but requested by some restorers!

Part No.	Description	Type	Price
FL107	1934-early 55 36"x54"	each	\$19.95

## PEDAL PADS, ACCELERATOR PEDALS, ETC.

### Accelerator Pedals

Part No.	Description	Type	Price
FL114	1947-51 (attaches to linkage rod with a pin)	each	\$16.30
FL115	1952-57 (attaches to linkage rod with a ball-socket to reduce in-cab engine noise)	each	\$15.95

### Accelerator Felt Floor Seal

Fits in the factory metal floor pocket.

Part No.	Description	Type	Price
FL111	1941-59	each	\$3.95

# Suburban Surprise!

GOOD NEWS! We have just created the 4 piece set that secures your rear and center removable seats to the floor on the 1936-59 Chevrolet / GMC Suburban.

We suspect the 1" x 1" curved brass block (as original to protect the horizontal seat leg) was lost after the first seat removal!

Different years and different seat sizes require a number of sets. Thus, we market them "as set".

### Suburban Rear Seat Fastener Kit

Part No.	Description	Type	Price
FL405	1936-59 Suburban Rear Seat Fastener. 4 pieces / set	set	\$12.95

How it looks sitting on your plate.

Flat washer protects seat leg pipe.

Brass 1" x 1" curved block protects bottom of seat leg pipe.

Wing nut keeps all snug.

Vertical 5/15" bolt holds all together.

### "... going to town's a cinch"

For a quick run to town to get groceries . . . feed for the stock . . . or to take the family to a movie—my new GMC pick-up sure does the trick. It handles just like a passenger car with its Ball Bearing steering and steering column gearshift. And the cab is really comfortable with its wide, deep seat, built-in ventilation system and complete insulation.

### "... works swell in the field"

It's easy to handle my GMC in the field . . . even with a full load. Chuck holes don't bother the rugged, "truck-built" axles, frame, springs and double-acting shock absorbers. Even the cab is rubber mounted to stand the twist and strain of field work. And that GMC-built valve-in-head engine has what it takes!

### "... sure carries a big load"

Hauling a big load is an easy matter for my GMC truck. When I ordered it, I just told my GMC dealer what my hauling job was and he figured out to a "tee" which model GMC was best for me. Sure hit it right on the button, too. Got a sturdy truck-built frame . . . war-proved and improved engine . . . the right axle and transmission ratio . . . everything I need to give me the best truck "farm hand" I've ever had.

## HIGH PERFORMANCE

### Fenton Cast Iron Dual Exhaust Chevrolet

Authority given by the original manufacturer to produce these in demand era accessories. These cast iron headers are exact in every detail, including Fenton lettering. The resulting dual pipes on your early pickup will cause that special six-cylinder purr, so often heard in past years. Nothing sounds like Fenton duals on GM six cylinder engines. Lower exhaust back pressure gives better performance!

Part No.	Description	Type	Price
HP102	1937-62 Chevrolet	set	\$295.00

Inquire at [oldchevytrucks.com](http://oldchevytrucks.com) for other colors.

### Intake Manifold, Six Cylinder Four Barrel

Our Ram-Flow 4-Barrel Manifold was primarily designed as a performance intake, but with the recent development of small 4-barrel carburetors (390-400 cfm), the 4-barrel intake assembly has proven to be the ultimate low R.P.M. assembly for today's six cylinder engines. The small 4-barrel carburetor and manifold actually get better mileage and more power than most 2-barrel carburetors. This Ram-Flow 4-Barrel Manifold has been designed to increase the performance and driveability of your vehicle and, at the same time, retain (and in most cases, improve) good fuel economy. This has been accomplished by attaining equal fuel- air distribution to each cylinder. Also included is a 4-barrel mounting plate which accepts any Holley or Carter AFB with a square bolt pattern. These manifolds have a new feature that makes them even better in cooler weather. An interior water flow system has been added. Hot water from the engine passes through the unit and warms the gasoline from the carburetor. Water line fittings included.

Part No.	Description	Type	Price
HPM540	1954-62 Chevrolet 235 and 261 six cylinder engines	each	\$689.00
HP103	1939-59 GMC 228, 248, 270, and 302 six cylinder engines	each	\$900.00

### Fenton Exhaust Manifold Warming Kit

For better engine performance when using Fenton Headers on your Chevrolet and GMC in-line six cylinder! Our kits allow hot exhaust from the headers to enter into a cavity created by a threaded plate under the original as well as the Fenton and other dual intake manifolds. Fuel is quickly warmed as it leaves the carburetor as was designed by General Motors.

**NOTE: To see this kit installed, check the High Performance Section of our 1947-55 Research Catalog at [www.jimcartertruckparts.com](http://www.jimcartertruckparts.com).**

Part No.	Description	Type	Price
HPM543	Chevrolet 235 and 261 engines	kit	\$97.15
HPM544	Chevrolet 216 1937-53, GMC 228,248,270, and 302 1939-59	kit	\$62.50

### Carburetor, Holley Four Barrel

This new, small 390 cfm Holley 4-barrel carburetor is factory calibrated to nicely match the cubic inches of your in-line six cylinder. Is excellent in combination with the intakes above. Does not require a special higher lift camshaft. However, it's also even better if you add an extra performance cam option. New, no core charge.

Part No.	Description	Type	Price
HPC300	1954-62 engines	each	\$710.80

### Fenton Manifold with Dual Intake Plus Linkage and Fuel Lines

Aluminum Fenton dual intake manifold that is a perfect match for the Fenton Headers HP102. Includes accelerator linkage and partial stainless steel fuel lines.

Part No.	Description	Type	Price
HP107	1954-62 For 235 and 261 Chevrolet engines	each	\$239.00

### Accelerator Linkage with Firewall Bracket

Used when placing a V-8 engine in a 1947-59 GM truck. Necessary if removing the original six cylinder. Note: On 1947-52 trucks, use 1953-57 gas pedal FP115 to reduce engine noise in cab.

Part No.	Description	Type	Price
HP142	1947-59	each	\$65.75

### Side Motor Mount Kit

Used when placing a 1958 and newer small block Chevrolet V-8, and 1963-80 in line six cylinder, in the 1940-early 55 pickup. Engine side mounts can be bolted on or welded to your frame. Includes cushion set, bolts, and instructions. A professional installation that eliminates the under engine round cross member sold in some stores.

Part No.	Description	Type	Price
HP121	1936-55	set	\$173.25

### Transmission Frame Cross Members

Our cross members fit well when you place a modern automatic transmission in the older GM trucks. It's 6" drop makes a successful fit on 350, 400, 700R4, and Powerglide transmissions.

Part No.	Description	Type	Price
HP1261	1939-59	each	\$121.80

**REHP137N**

**REHP137P**

**Alternator, Six Volt**

Equipped with modern internal voltage regulator. Has a charging capacity of 40 amps (twice the amps as the original generator) to protect original amp gauge. Can be adapted to all 6 volt vehicles. Rebuilt. No core charge. (Used with HP130 or HP131.)

Part No.	Description	Type	Price
REHP137N	1953-54 Chevrolet with narrow 3/8" pulley. (negative ground)	each	\$145.00
REHP137P	1934-early 55 GMC (positive ground)	each	\$175.00

### Alternator, Twelve Volt

Designed to replace the original generator. Has internal voltage regulator and a charging capacity just below 60 amps. Negative ground only. Rebuilt. No core charge. (Used with brackets, HP130 or HP131). **Warning:** A late model 12 volt alternator charging at over 100 amps to a dead battery may ruin the original amp gauge.

Part No.	Description	Type	Price
REHP136	Negative ground	each	\$175.00

### Alternator Pulley, 216

Designed for a GM alternator with wide pulley when you use the original wide belt. Matches width of original 216 Chevrolet Harmonic Balancer.

Part No.	Description	Type	Price
HP530	1937-52 Chevrolet 216 engine	each	\$34.15

### Alternator Flat Fan

You will need a "flat" alternator fan to use HP530 above. Most come with this fan design. Otherwise, we can provide it. Made in USA.

Part No.	Description	Type	Price
HP531	Alternator flat fan	each	\$12.60

### DA Plug for Alternators

Allows the use of your original ignition switch when using a modern alternator. Prevents the engine from continuing to run after you turn off the switch. A simple plug-in to your alternator.

Part No.	Description	Type	Price
HP240	For 6 or 12 volt	each	\$42.50

### Distributor and Coil, Modified HEI

This electronic ignition greatly improves starting and performance. No points to wear out! No gradual change in timing! A late model modern GM distributor has been machined to fit the older in-line six.

This excellent used GM modified housing includes new HEI coil, rotor, cap, lead wire, vacuum advance, new main shaft and instructions. Twelve volt 235 engine and 261, not 216. No core charge. This small distributor and small round coil look similar to the 1937-62 six-cylinder unit. Does not take away from the original appearance!

Part No.	Description	Type	Price
HPD151	1954-62 HEI Coil	each	\$44.10

### Spark Plug Wire Set for HEI Distributor

Part No.	Description	Type	Price
ELW542	1937-62 Set of wires with insulated caps (6-cylinder)	set	\$49.10

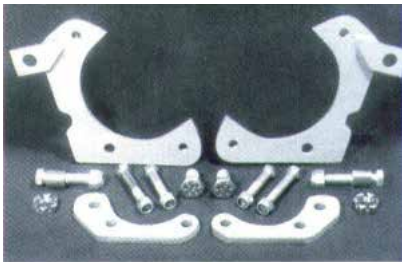

HP1412

**Disc Brake Kits, Complete Front - 5 Lug Pattern**

Everything you need to equip your existing straight axle front end with modern brakes. Includes HP1402 or HP1403 kits plus tapered roller bearings, seals, rotors, rebuilt calipers, brake pads, etc. Saves you time and money from gathering modern parts locally! Not to be used with original master cylinder.

Part No.	Description	Type	Price
HP1412	1941-50 1/2 ton	kit	\$472.50
HP1413	1951-59 1/2 ton	kit	\$472.50

HP1412

**Disc Brake Conversion Kits**

Use with your existing straight axle and spindles. A top quality, American made bolt-on assembly. Includes caliper mounting brackets, attaching hardware to spindle, bearing adapters which use your modern tapered roller bearings, and instructions for using your late model calipers, five lug rotors, pads, seals, and bearings. (Used in complete kits above.) You obtain other more common parts locally.

Part No.	Description	Type	Price
HP1402	1941-50 1/2 ton adapter	kit	\$262.50
HP1403	1951-59 1/2 ton adapter	kit	\$262.50

**Disc Brake Kit, Complete Front - 6 Lug Pattern**

This 6 lug disc brake kit contains what you will need to put modern discs on your stock 1/2 ton spindles, and uses your stock hub. Includes GM rotors, calipers, brackets, spacers, hoses, and brakes. HP508 and HP509 are options for this disc brake kit.

Part No.	Description	Type	Price
HP500	1941-54 1/2 ton, front	kit	\$734.95

**Wheel Bearing Upgrade, Front**

For those that prefer to eliminate the original front ball bearings, we have the conversion. Changes the original balls to modern roller type. Includes inner and outer bearings with races plus grease seals. Works with original 1/2 ton drums as well as HP500.

Part No.	Description	Type	Price
HP508	1941-59	kit	\$225.00

**Wheel Spacer Kit**

Included in HP500.

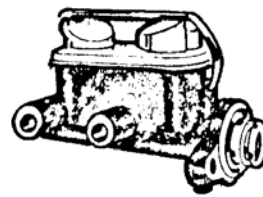

Part No.	Description	Type	Price
HP509	1941-54 1/2 ton 3/16" wheel spacers. (Some later model wheels rub the caliper when you add modern disc brakes)	kit	\$31.00

### Disc Brake Power Master Cylinder Kit

If you want the power booster option instead of the non-power disc master cylinder (HP167). Includes the booster, power disc brake master cylinder, proportioning valve, mounting bracket to frame, and the lines all in one assembly. Will operate either the 5 or 6 lug front brake kits above. Not designed for 1946 and older or for drum brakes.

Part No.	Description	Type	Price
HP520	1947-54	kit	\$418.95

### Master Cylinder for GM Non-Power Disc Brakes

We provide a dual chambered master cylinder that will work well without a booster unit; thus no need to connect an extra vacuum line to your engine. (We recommend a proportioning valve, HP169) Use your original foot pedal when using our mounting bracket HP161.

Part No.	Description	Type	Price
HPB167	1948-59 Master cylinder, GM disc non-power	each	\$88.75

**Remember: Many early GM disc brake cars came without a booster.**

### Master Cylinder, Dual Chamber for Drum Brakes

If you want a modern dual chambered master cylinder while keeping your original drum brakes, this unit is for you. (Use with mounting bracket HP161.) Not for disc brakes!

Part No.	Description	Type	Price
HP415	1948-59	each	\$94.00

### Master Cylinder Mounting Adapters

Secures a modern dual chambered master cylinder when the original single reservoir cylinder is removed. This bracket allows the mounting of this modern master cylinder under cab floor with or without the power booster and the use of the original brake pedal. Includes rod from cylinder to pedal and mounting hardware.

Part No.	Description	Type	Price
HP161	47-55	set	\$145.90

### Proportioning Valve

Necessary when using disc brake master cylinder in combination with rear drum brakes.

Part No.	Description	Type	Price
HP169	Brake fluid valve, adjustable type	each	\$94.00

**Mustang II to Chevrolet Disc Brake Conversion Kit**

A popular front suspension for the custom truck is the rack and pinion assembly from the 1974-78 Mustang II. It attaches very nicely to the 1959 and older GM 1/2 ton frame. We offer an excellent brake conversion kit which allows you to use larger 11 inch diameter GM car rotors, calipers and discs, while keeping the Ford Mustang spindles. Provides 65% more braking capability over the 9 inch Mustang II rotor. (The front wheel 4-3/4" bolt circle pattern will now match the rear if you use most GM car five-bolt system.)

Note: User must supply stock Ford upper caliper cradle mounting bolts on all Mustang kits.

Part No.	Description	Type	Price
HP171	Conversion Kit 1/2 ton	kit	\$157.50

**Mustang II to Chevrolet Disc Brake Conversion Kit, Complete**

Includes the above HP171, plus the necessary rotors, calipers, brake pads, seals, bearings, etc. Saves you time and money from gathering modern parts locally!

Part No.	Description	Type	Price
HP172	Conversion Kit 1/2 ton	kit	\$414.75

**TUBE SHOCK KITS**

**Shock Absorber Conversion Kit**

For those wishing to add modern tube shock absorbers to their 1949 and older 1/2 ton pickup with original lever action shocks. We now stock a complete kit which includes upper and lower forged steel shock mounts, front and rear, plus 4 gas shocks. Because the kit was designed for 1947-49 1/2 ton, you will need to drill holes in your frame rail for the four upper shock mounts. NOTE: We had these eight shock mounts "heat forged" just like the originals. They don't look homemade!

Part No.	Description	Type	Price
HP590	1936-49 1/2 ton (also correct 1950-54 replacement)	kit	\$399.95

**NOTE: For shock mounts only, see our Mechanical Suspension Section.**

**Axle Housing to Leaf Spring Attaching Kit**

Allows you to replace your original closed drive shaft axle to a modern differential with 3" axle tubes. Includes U-bolts, lower plates, saddles, etc. Welding of saddles to axle housing required.

Part No.	Description	Type	Price
HPD179	1934-59 1/2 ton only	kit	\$143.00

HP163

HP200

HP165

**Differential Bearing, Bushing, and Seal Kits - 1/2 Ton**

For use with HP163 Ring and Pinion Set when you require all wearing parts replaced. Kit includes such items as pinion and carrier bearings, pinion and wheel seals, gaskets, torque tube bushing, etc. Individual components are listed in MECHANICAL section.

Part No.	Description	Type	Price
HP165	1940-50	set	\$519.75
HP166	1951-54	set	\$519.75

**Ring and Pinions For Differential - 1/2 Ton**

These ring and pinion sets allow your 1/2 ton pickup to cruise at highway speeds. They increase the 4.11 ratio on the 1940-53 closed drive line to 3.55 and the 1954 original 3.90 ratio to 3.55. Your trucks personality is now completely changed! While nothing is visible outside, engine RPM is reduced almost 20%.

**Note: When placing the 3.55 ratio in a 1954, you must use the ring gear spool from the 1940-53. Which is not difficult to locate.**

Part No.	Description	Type	Price
HP163	1940-54 3.55 ratio	set	\$472.45
HP200	1955-62 3:38 ratio	set	\$419.50

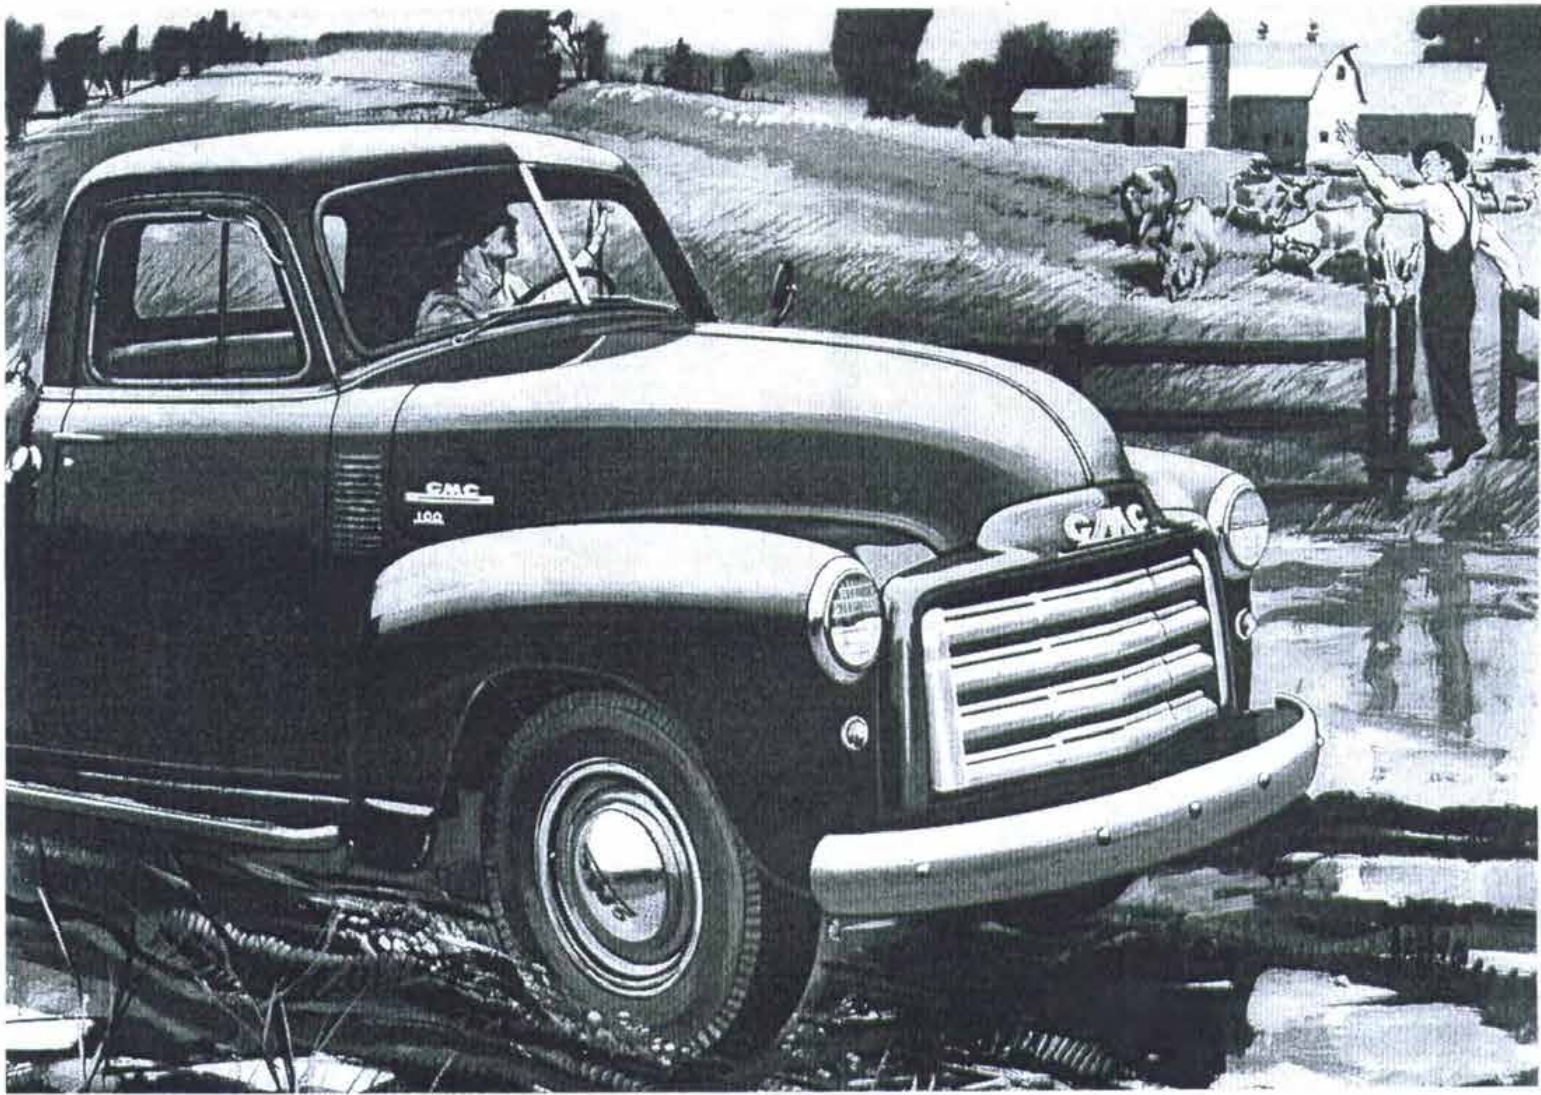

**Differential Chrome Cover**

This 10 bolt cover includes gasket and drain plug. For a little extra "flash" the cover and plug have been polished and chrome plated. You will be quickly noticed by the following traffic!

Part No.	Description	Type	Price
HP245	1933-62 1/2 Ton	kit	\$73.45

# ***BUILT TO "GO" - and keep going!***

**I**F you want a truck that will be your top farm hand—one that will keep working for you year after year—then it's got to have two things. You want it to have a powerful engine mounted in a sturdy chassis—a truck that can go *and keep going*, through all kinds of rough-and-tumble service.

That's why you'll like the horse sense in the engineering of these new GMC's.

### **More "Go" When You Need It**

For these new ½- to 2½-tonners not only deliver horsepower unbeaten by any other farm truck—they've got what it takes to go with it.

GMC's smooth Synchro-Mesh Transmission pours the power to rugged axles—*keeps these trucks going through the mud and daily grind of farm service*—while "pillow-action" springs cradle the load!

### **GMC Performance Is Protected**

In dry spells, horsepower is safeguarded against dust and grime. The engine in a GMC is full-pressure lubricated—*extra-protected against wear*. Even the connecting rods are rifle-drilled to pack the piston pins in a pressure-bath of filtered oil!

See your GMC dealer. See why the "Six-Footer" Cab of a GMC is the

*driver's seat of a real truck—a truck built for farm work, built for keeps!*

Light Loads or Heavy . . . Good Roads or Bad  
**IT'S A CHEVROLET JOB!**

Loaded with power, Chevrolet trucks with the great Loadmaster 105-h.p. engine have what it takes for rough ground and the long, hard pulls. Certified ratings prove that these Chevrolet trucks provide *more net horsepower*—power delivered at the clutch—than any of the five other leading standard equipped conventional trucks in this weight class, 15,000 to 16,000 lbs. G.V.W.\* With this extra get-up-and-go, Chevrolet trucks serve you better . . . and cut your costs, too.

\*1955 F-Series Trucks.

You save time on the road, money on operations, and—with Chevrolet's built-for-the-load construction—spend less on maintenance. That all adds up to low cost per ton mile—in every mile of every job! It's one of the many reasons why Chevrolet trucks are the nation's biggest truck values, and the choice of more truck operators than any other make. But get the rest of the reasons for Chevrolet truck popularity before you buy any truck. See your Chevrolet dealer.

**Note: The blue dot is a non-GM option popular if you want a more custom appearance.**

### Taillight Bulb Changeover

The 1940-53 reproduction taillights produced during the past 25 years are not designed to hold the original large 21 candle power stoplight bulb! We have created a bracket for inside your taillight bucket which eliminates the small three candle power bulb and allows the adding of the large 21cp bulb as was original. With this changeover, your stoplight will be seen easier and at a greater distance. Get the most out of your original style taillights and lessen accident potential. (Not included with LG152, LG154, LG155, or LG195.)

# Go by the Plain Hard Facts ...and SAVE!

(Continuation of standard equipment and trim illustrated is dependent on availability of material.)

## They show why a Chevrolet truck costs less to own and operate

Just about two and a half million users of Chevrolet trucks are proving this fact every day: You can't buy a better truck to save your money.

You save when you buy. You save on operation and upkeep. You save on getting the job done fast and right. You save when you trade.

And along with these savings, you get a rugged dependable truck that's a real satisfaction to drive. Good

and comfortable cabs, Flexi-Mounted for extra quietness and long life. Seats with double-deck springs that a man can live with. Ball-Gear steering to take the arm-ache out of driving. Synchro-Mesh transmission for fast, safe downshifts on grades.

See your Chevrolet dealer and talk over your farm truck needs. . . . Chevrolet Division of General Motors, Detroit 2, Michigan.

### MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!

#### Fact No. 1

##### Saves you money on purchase

Get yourself the price on a Chevrolet truck that's the right size, type and capacity for your work. You'll find it has a lower list price than any other make of truck of similar size and capacity. Here's an immediate, cash saving that Chevrolet offers.

#### Fact No. 3

##### Gives you the right truck for the job

You buy a truck to get a job done. Chevrolet trucks are factory matched to the job—tires, axles, frame, springs, engine, transmission, brakes. It's the Chevrolet idea to provide you with as much truck as you need: Not "too much truck," not "too little truck"—just right.

#### Fact No. 2

##### Cuts operating costs

A Chevrolet truck works for rock-bottom "wages." It brings you the proved economy of Valve-in-Head engine, with extra-rugged truck features: Hypoid rear axle, deep channel-type frame, Ball-Gear Steering, Synchro-Mesh Transmission, Flexi-Mounted cab.

#### Fact No. 4

##### Saves money through lower depreciation

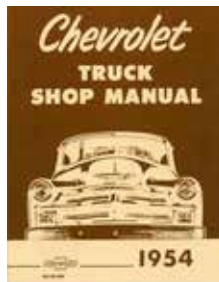

Chevrolet trucks traditionally bring more money on the used truck market—and that can mean more money for you when you trade or sell. Add the savings of low first cost, low operating cost. You'll see why more truck users choose Chevrolet than any other make.

# 1947-55 CHEVY AND GMC PICKUP

## CUSTOM A/C, HEAT AND DEFROST COMBO 12 Volt

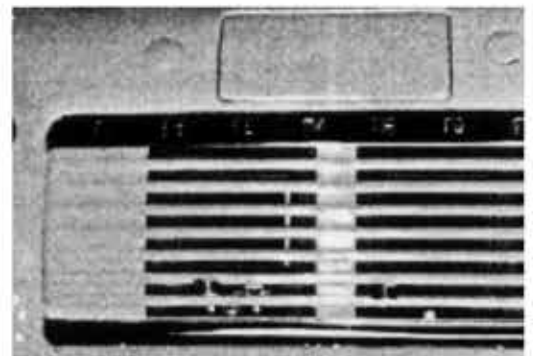

Unit mounts directly to firewall, where all A/C and heater lines route through the factory blower motor hole with a neat rubber grommet and trim plate.

Choose from under dash custom molded plenum as per picture above OR our new hidden system that blows through the factory speaker grille.

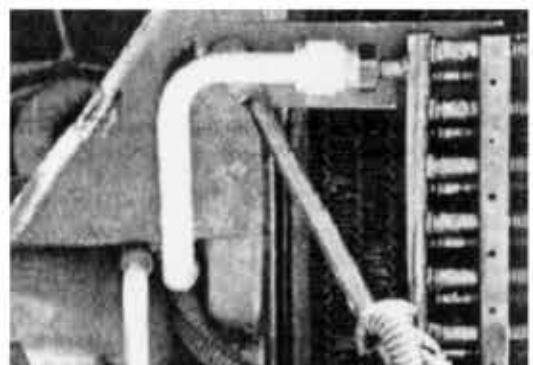

Designed for ease of installation, with custom condenser mounting, neat aluminum lines, and step-by-step instructions. Retains top cowl vent assembly and majority of glovebox. Has floor heat, and dehumidified defrost.

Both straight 6 or V-8 compressor and alternator mounting brackets available.

**See 1st page of Mechanical Section for details!**

Hidden system behind speaker grille with lever style switches.

## AIR CONDITIONING - NOW AVAILABLE (12 VOLT ONLY)

We now have custom systems designed just for the 1947-53 Chevrolet and GMC trucks. If you've wondered how to add this accessory and still keep a nice appearing dash, this system is for you. It even includes a high efficiency heater for winter driving! We provide the inside cab components only OR the complete system (less refrigerant) including the under hood compressor and mounting brackets, condenser, A/C hose kit, etc. **Alt. Bracket Not included.**

When ordering, we must know the following:

1. If you need a complete kit,
2. Are you using an original type 6 cylinder or Chevrolet small block V-8?
3. Is the length of your small block V-8 water pump 5-5/8" or 7"?
4. Under dash or hidden behind speaker grille kit?
5. Is the alternator on the driver or passenger side of your small block V-8?

**Carburetor Repair Kits**

Please remember many of these carburetors are interchangeable. Thus, during the last 60 years the exact unit was not always used as a replacement. For example, the GMC Zenith carbs were often replaced with units from Chevrolet 216 engines. Therefore, it is very important to check your carburetor before ordering a repair kit. Sorry, we can't take back kits once they have been opened.

**Gas Tanks - New (Original Design)**

Our new metal plated units are shaped and formed just like GM.

Part No.	Description	Type	Price
MEG149	1947-48 1/2 ton Pickup, (fits under right side of bed as original)	each	\$374.95
MEG150	1949-55 Pickup (all cabs with tanks behind seat)	each	\$330.00
MEG149	1947-55 1/2 ton Suburban and panel trucks, (fits under and fills on right side of body as original)	each	\$374.95

**NOTE: Our MEG150 tanks have been given the correct "pipe threads" in the fuel outlet hole. These correct threads are needed for a proper gasoline seal. WARNING: This thread modification has not been done to 1949-55 tanks offered from some suppliers!**

**SAFETY FIRST: GM protected this tank by surrounding it with a heavy steel seat riser plus a double layered cab exterior. Certainly equal or better in safety than hanging it with little protection behind the rear axle! REMEMBER: the rear end Ford Pinto explosion in 1972 that killed three passengers? Check Google Search!**

**Gas Tank Spout Kit**

Includes spout, gas cap, 2 clamps, filler hose, and grommet.

Part No.	Description	Type	Price
MEG148	1947-48 1/2 ton, plus 1947-55 Suburban and panel truck	pair	\$104.95

**Surprise! New in the market:** For 1949-53 Chevrolet GMC 1/2 ton owners that want the metal gas tank out of the cab! SAFETY FIRST: Our kit allows you to safely place the tank under the bed in comparison with the dangerous position behind the rear axle with almost no protection. Remember the 1972 Ford Pinto that was rear ended in the mid-1970's, burst into flames and the two Pinto passengers were killed in the fire! Yes, it came with a factory installed rear mounted tank! Check this on Google.

Our tank kits are protected by the frame rail as in the 1947-48. Gasoline is added through the right bed side just like 1947-48 1/2 ton. Includes 16 gallon metal tank, frame mounting brackets, straps, gas filler spout, rubber hose connector, hose clamps, bed side grommet, gas sending unit, and filler cap. For very long gas line from tank to fuel pump on 6-cylinder motor. See page 108, MEE132 or MEE133. NOW you will still be able to carry your spare tire correctly under the bed as original.

Regardless of weather or roads, motor trucks pick up and deliver most motion picture film at night to make it available for the next day's showing.

## Midnight on Main Street

There are no alibis in the motion picture film delivery business. The "show must go on" seven days a week, twelve months a year . . . delay in the arrival of new film means disgruntled customers and lost revenue.

One film distributing firm alone operates 153 trucks more than 24,000 miles a day, servicing 1215 theaters in nine states. And there are many more GMC trucks in this fleet than any other make.

When you want reliable transport service . . . for any type company or commodity . . . GMC's day-in-and-day-out dependability really pays off.

# ***BUILT TO "GO" - and keep going!***

**I**F you want a truck that will be your top farm hand—one that will keep working for you year after year—then it's got to have two things. You want it to have a powerful engine mounted in a sturdy chassis—a truck that can go and keep going, through all kinds of rough-and-tumble service.

That's why you'll like the horse sense in the engineering of these new GMC's.

### ***More "Go" When You Need It***

For these new ½- to 2½-tonners not only deliver horsepower unbeaten by any other farm truck—they've got what it takes to go with it.

GMC's smooth Synchro-Mesh Transmission pours the power to rugged axles—keeps these trucks going through the mud and daily grind of farm service—while "pillow-action" springs cradle the load!

### ***GMC Performance Is Protected***

In dry spells, horsepower is safeguarded against dust and grime. The engine in a GMC is full-pressure lubricated—extra-protected against wear. Even the connecting rods are rifle-drilled to pack the piston pins in a pressure-bath of filtered oil!

See your GMC dealer. See why the "Six-Footer" Cab of a GMC is the

*driver's seat of a real truck—a truck built for farm work, built for keeps!*

# For "Field Trips" and All Trips There's Nothing Like a GMC

Rugged and powerful, GMC trucks have plenty of "what it takes" to handle all of the thousand-and-one hauling jobs encountered in farm work. Their famed valve-in-head engines are truck-built for dependable, thrifty performance . . . their strong chassis are truck-built, too, for extra stamina and long life.

Out in the pasture or out on the pavement GMCs work equally well . . . and when the hauling chores are done they're ready to "go to town" with big, broad cabs that seat three comfortably, and sleek, streamlined good looks that are at home in any company.

GMCs have long been favorites in the farm field . . . solid favorites because they are solidly built by the world's largest exclusive manufacturer of commercial vehicles . . . favorites because their performance and economy, on all jobs, prove *there's nothing like a GMC.*

GMC TRUCK & COACH DIVISION • GENERAL MOTORS CORPORATION

**GMC**  
GASOLINE • DIESEL  
**TRUCKS**

Trig and trim, with passenger car-like comfort and handling ease, hard working GMCs also provide fine family transportation.

Supplies are moved from town to farm, produce from farm to market, quickly, dependably and economically with a GMC.

## PAINT COLOR IDENTIFICATION

We are often asked, "What are the specific shades of the paint colors?" "Is Transport blue or Swifts red light, medium, or dark?" The following will help you identify the more popular 1947-55 colors.

To see the original paint on your truck, check the engine side of the firewall. Even if the truck was repainted, this area is usually given less preparation and thus old paint can be uncovered. Remember, during these Advance Design years, GM did not stamp paint color codes on its trucks. Therefore, any of the approximate 12 factory colors are correct in an authentic restoration.

### Green

Forester, Juniper, and Brewster: These were the darker of the greens. They were usually the standard color if you did not specify one of the other non-extra cost color options. Thus, many dark green trucks exist. Ocean, Seacrest, Apple, and Narva: Lighter greens, also very popular on even automobiles at that time.

### Blue

Boatswain, Mariner, and Ferrera: These were the darker shades of blues. Very popular when the trucks were new! Transport, Export, and Windsor: Medium blue. Not sky or powder blue.

### Red

Swifts, Pimpernel Scarlet, Flame, and Commercial: A bright shade used less in the conservative early years. Now a very popular choice! Permanent, Burgundy Maroon, and Cape Maroon: A dark red. Popular then and now.

### Orange

Omaha: A bright color once more popular with commercial buyers than individual retail owners.

### Yellow

Armour: An almost Canary yellow seen on fewer early trucks unless ordered by commercial buyers for their business.

## PAINT, EXTERIOR

To date, most of our customers have found no supplier for the proper colors for vintage GM trucks. The only choice was to have paint mixed to approximate the original. We can now correct that problem. We have obtained a source for the more popular exterior colors for Chevrolet and GMC, 1936 and up. 1/2 and 3/4 ton pickups usually require 1-1/2 gallons for good paint coverage. Good News: All exterior enamel paints are mixed when you order. Thus, separation and shaking is limited.

**Note: Quantity limited to two gallons total volume per package. No paint shipped out of the 48 Continental United States.**

## Most everyone has heard about POR-15.

We were so impressed with what this product can do for you in your restoration, we became a dealer! Whether you are painting the frame on a body-off restoration or just protecting your battery tray from acid chemicals, this "one time" application will do the job. Even great on farm machinery and underwater marine items. It's proven reputation is unequaled!!

### POR-15 Coating

### This is what its all about!!

Chemically combines with rust as you paint. No need to remove light rust first. Great on truck and car parts such as frames, suspension, floor pans, corroded battery trays, and even engines. This is not just paint. It is so tough you will be surprised how little the chassis is effected by rocks on gravel roads.

Part No.	Description	Type	Price
POR15DPSPG	Semi gloss black	pint	\$41.95
POR15DPQB	Semi gloss black	quart	\$62.95
POR15DPB	Gloss Black	pint	\$38.80

### Fuel Tank Sealer, POR-15

This high-tech sealer is formulated to not only stop pin hole leaks but resists all fuels including those with higher alcohol content. Stops rust corrosion, and leaks permanently. Chemically bonds to the inside tank metal surface. Seals up to a 25 gallon tank.

Part No.	Description	Type	Price
POR15DQFTS		quart	\$51.20

## RADIOS

### Restored Factory 6 Volt Radios.

Looks Great! Check on availability. We are often out of cores!

Part No.	Description	Type	Price
RERA122C	1947-53 Chevrolet, complete, less antenna	each	\$595.00
RERA122G	1947-53 GMC, complete, less antenna	each	\$595.00
RERA123C	1954-55 Chevrolet, less antenna	each	\$595.00
RERA123G	1954-55 GMC, less antenna	each	\$595.00

**Note: We can offer you a nice price if you sell us your old unit needing repairs or have yours restored.**

### Voltage Booster

Will operate 12 volt negative ground accessories from 6 or 8 volt negative ground electrical systems. The booster is very small (3-1/2" x 2-1/8" x 1-5/8") and is easily mounted under dash. It can continuously supply about 1-3/4 amps, which is adequate for stereos, CB radios, cellular phone chargers, radar detectors, etc. One year warranty. Note: Will not work with positive ground systems.

Part No.	Description	Type	Price
EL219	Voltage booster for 6 volt systems to make 12 volts.	each	\$121.25

### New Reproduction Radios - 6 or 12 volts.

These are great! Introduced a few years ago! Looks like the original radio in the factory dash opening, however behind the dash is a small light weight 12 volt box with new modern controls. You have to look under the dash to know is not pure GM. Push the tuner dial and it even changes from AM to the FM stereo band! These radios support from one to four 45 watt, 4 ohm speakers.

**Note: If you have a 6 volt system, use our voltage booster to furnish 12 volts to the radio, FL219.**

Part No.	Description	Type	Price
RAR107	Fits between bottom of case at edge of lower dash and over tuning shafts between dash and case.	set	\$35.70

### Radio Noise Suppressors

On some applications annoying ignition noise is picked up and heard through the speakers. This is usually due to original style copper core spark plug wires. It can be eliminated with our suppressors. They originally were attached to three places on your truck's electrical system. Try one or all three to eliminate noise. Place on battery terminal of voltage regulator, battery side of coil, and armature side of generator, (or use EL130 wires without copper).

Part No.	Description	Type	Price
RA450	Radio suppressor	each	\$43.00

## CAB SHEET METAL

We provide a large selection of specially formed metal body panels. These excellent reproductions replace areas that are often badly rusted in these older trucks. Nice gauge, proper bends, etc. Recently introduced are larger metal panels that were not even available in the 1950's. They will replace damaged areas that restorers now need repaired. Much complicated tooling has been created to make these panels fit just right. To keep your freight charges lower on the longer sheet metal, we may ship some of the larger panels from a central warehouse.

### Top Cowl Panel

Replaces the cowl metal between the hood and bottom of windshield. About 56" side to side and stops at the factory side lead joints. Includes holes for wiper shafts, top cowl vent and several inches of the vertical firewall.

Part No.	Description	Type	Price
SMC300	1947-53	each	\$314.95

### Cab Roof Panel Skin

Have people been standing or jumping on the top of your cab? We have new outer roof panels.

Part No.	Description	Type	Price
SMC302	1947-53	each	\$341.25

### Cab Lower Back

Trucks seem to get much rust in this area! This replaces the panel between the door edges, mid-body upper seam, and frame rail. Includes outer cab corners.

Part No.	Description	Type	Price
SMC303	1947-55	each	\$472.45

### Cab Outer Back

Part No.	Description	Type	Price
SMC304	1947-55 deluxe (with corner windows)	each	\$372.75

### Cab Inner Back

Part No.	Description	Type	Price
SMC312	1947-55 deluxe (with corner windows)	each	\$366.45

### Dash

When your dash has been badly cut and rusted. We provide the full panel from cowl to cowl including factory openings for gauges, ignition switch, radio, etc.

Part No.	Description	Type	Price
SMC306	1947-53	each	\$351.75

SMC308

SMC309

### Complete Floor Pan, Original Style

A large one-piece assembly. Includes floor, battery and master cylinder hole, seat riser, under seat panel, gas tank straps, etc.

Part No.	Description	Type	Price
LGR300	1947-72 With license plate box	pair	\$20.95

**Rear Splash Apron or Gravel Shield**

This rear metal filler pan fits between the factory bumper and bed. Looks like GM should have put it there! The "last detail" when making a mild custom on an otherwise original truck. Fills in the open space but does not interfere with the tailgate. Designed for 1/2 ton. Modifications needed if used on 3/4 ton due to different rear bumper braces.

Part No.	Description	Type	Price
SM322	1947-53 Chevrolet or GMC	each	\$173.25

**Wheelwell Housing or Tub, Fiberglass**

Four inch fiberglass wheel housings that attach to the inside of the stepped pickup. A great addition for the high performance stepped pickup that requires wider performance rear tires. A 3/4" horizontal edge fastens to the bedwood. An invisible edge bolts to the bedside and its fasteners are not visible. The finished product looks almost factory installed. Made in USA. IMPORTANT: Width 4" wide.

**Fender Protectors**

Stop "fender stars" in your paint! Yes, sharp gravel points hitting under your fenders at high speed can put unsightly stars on the top painted surface. Protect your fiberglass and metal fenders. Deflect road gravel using specially developed "knobby" designed, flexible, black panels that form and adhere to the underside of your fenders. Great insurance protection against paint stars. Guaranteed not to separate when applied properly. Each kit contains two 1/4" thick panels 10" x 42", adhesive, and instructions.

## 1947-55 Chevrolet “Deluxe” Panel Deluxe Truck Trim

During 1947-55 years (except 1952-53 Korean War Years), Chevrolet offered a very deluxe panel truck to make deliveries in the fast growing new city suburbs. We have the mirror polished trim available. Includes the 12 horizontal fender strips, as well as the stainless side window and windshield trim that was on this special panel truck. For even better detail check our website. Click Articles, then Tech Articles, Click on the 1947-55 catalog, and finally click Panel Truck. Note: The long horizontal front fender trim, TRT402, is also produced. Also see page 192

**Surprise! It can also fit the pickups with slight bending at rear, TRT402.**

**Yes, they will fit a pickup's rear fender!**

**See page 192, Part # TRT400P**

## UPHOLSTERED SEAT KITS

### Now Available! For The Perfectionist!

Much time and effort has been spent creating the original Spanish Grain Vinyl seat material and matching door panels. This is a special limited production run. These items will separate the men from the boys at the next show.

Even if you just love driving your truck and don't do shows, this heavy vinyl will give you many years of good service. These quality heavy duty seat kits are pre-made with correct piping, dimensions, and stitching. They are ready to be professionally installed on your padding, springs, and frame.

**NOTE: Padding and clips are available as #UP100 installation kit (see next page).**

## DELUXE CAB INTERIOR ITEMS — 1954-Early '55

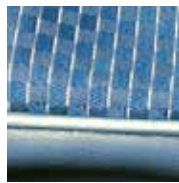

In mid-1954, General Motors Truck Division made available four different optional deluxe two-tone interior cab packages. We presently have almost all components reproduced for the Chevrolet in both the blue and green packages. The following is a breakdown of those interior items that are available for this deluxe 1954-early 55 Chevrolet.

For the Perfectionist: This unique two-tone deluxe cab package also includes: stainless outside windshield and side window trim, chromed wing vent frames, running boards painted lower body color, two inside sunvisors and arm rests, plus chrome grille, bumpers and hub caps. On Chevrolet, it was only available on the five window cab; however, on GMC, it could be purchased on either the three or five window cab.

### Cab Interior Paint

Originally on the most deluxe package on the 1954-55 Chevrolet five window cab. This lighter color is used on doors, cab, seat frame assembly, lower dash, and seat riser. The darker color is placed on the inside window and lower windshield trim, door panel frames, top of dash, steering wheel and column.

Part No.	Description	Type	Price
PT212	Light Blue	quart	\$52.25
PT214	Dark Blue	quart	\$52.25
PT211	Light Green	quart	\$52.25

### Upholstery Seat Kits

Originally on the deluxe package on the 1954-55 Chevrolet. Consists of a limited production woven patterned checked cloth on the flat surface of the back and seat bottom. The boxing or edges are harmonizing lighter tone (close to door interior color) grained vinyl and sewn with proper beading, as original.

Part No.	Description	Type	Price
UP224B	Two-tone Blue	set	\$462.75
UP224G	Two-tone Green	set	\$462.75

CB182

### Cab Windlace 1954-55 Deluxe Cabs

The following two colors were originally available with specific two-tone interiors on 1954-55 Chevrolet and GMC deluxe cabs only. They matched top of dash, interior window frames, etc. Also nice when harmonizing colors on your non-original custom trucks. Presently produced in very limited quantities.

Part No.	Description	Type	Price
CB182	Dark Blue, lower	pair	\$19.45
CB180	Dark Green, lower	pair	\$19.45

Here are a few "Brass Tack" advantages

**VALVE-IN-HEAD ENGINE:** Chevrolet's built-in valve and head design makes maintenance simple and easy. Chevrolet has built-in valve-lifters that require few oil changes and no valve adjustments.

**4-WAY LUBRICATION:** One of the reasons why Chevrolet trucks are so long-lasting is their 4-way lubrication system. It keeps the engine cool and clean.

**FLARE-BALL GEAR SYSTEM:** The flare ball is mounted through the axle housing to eliminate flexion of axle shafts. Better ride, less wear.

**STURDY HYPOID REAR AXLE:** Heavy-duty hypoid gears in the axle housing and pinion give you extra strength and dependability.

**SYNCHRO-MESH TRANSMISSION:** Easy to shift, quiet, and shifting that makes road or double shifting. Fully rugged for long life.

**UNIT BODY IN BODY:** Chevrolet body design, aluminum, steel, and gold or bodies are built to last. They're built to last. They're built to last. They're built to last. They're built to last. They're built to last. They're built to last.

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!
